

The easy way to share
a child's important
milestones and
activities

*Journals is a **private and secure** app for the **TAC** (team around the child) or a **young person** to store thoughts, interactions and activities, to then share best practice with parents and other stakeholders (GP's, Social Workers etc.) enabling them to keep up to date with progress*

Life story work is a **social work intervention** designed to recognise a child's past, present, and future, which can be demonstrated in our app.

Journals enables an elected staff member *companion or the young person to easily **record audio voice clips, write or dictate personal letters, upload images or photos and upload or record videos** in a secure, cloud-based app and make content available to parents and key stakeholders, who might otherwise miss these important milestones.

Content is shared **privately and securely** (closed group), ensuring recipients are a key part of the special moments of the young person's life.

A unique feature of the Journals service is that it provides users with the ability to both save and future-post multimedia, so that updates, invites and messages can be delivered on a specific date in the future.

This also enables key workers and the TAC team to upload and post content at a time convenient for them.

Ideal for creating

- Video updates (Happy birthday to Mum, Dad, Brother, Sister)
- Progress or review updates
- Share photos and memories with audio explanations
- An activity or shared experience update for social workers
- A daily journal for positive mental health and well-being
- Schedule a meeting date with a future post and related link

*Companion is a trusted person (key worker) who can act on behalf of a young person or multiple young people, to create or share moments (with appropriate permission), so ideal for all types of work and daily activity, including journaling, storytelling, scrapbooking, activity, or event updates, and so much more.

All content stored in a
secure cloud-based
environment
